PROFESSIONAL SUMMARY

Motivated Computer Science student at Sukkur IBA University with a strong foundation in Python and Machine Learning. Proven ability to build end-to-end ML pipelines encompassing data preprocessing, feature engineering, model training, and performance evaluation. Co-leads AI awareness initiatives and actively mentors peers in Python and ML fundamentals. Introductory experience with full-stack MERN web development.

EDUCATION

Sukkur IBA University

2023 – Present

Bachelor of Science in Computer Science • CGPA: 3.76 / 4.00

EXPERIENCE

Artificial Intelligence of Pakistan (AICP)

2025 – Present

Co-Lead

- Co-leading AI awareness campaigns; organizing structured workshops on ML fundamentals and Python programming for university students.
- Mentoring beginners through hands-on Python and Machine Learning sessions, fostering practical skill development.

Empowerment Through Learning (ETL) Pakistan

2025 – Present

Campus Ambassador

- Promoting digital learning programs at campus level and engaging students in skill-development initiatives.

PROJECTS

Smart AI Travel Budget Planner

- Built an AI-powered app where tourists select any country and trip preferences to receive real-time, currency-accurate budget breakdowns (flights, hotels, meals, transport) via live exchange rate APIs.
- Trained an ML regression model on historical travel data to predict personalized trip costs with confidence intervals across 50+ countries, delivered via an interactive Streamlit dashboard.

Air Quality Index (AQI) Predictor

- Built a regression-based ML model to predict AQI from environmental sensor data; applied cross-validation and hyperparameter tuning, and visualized key metrics through Matplotlib dashboards.

Global Hunger Index Analysis

- Analyzed multi-year global hunger datasets to uncover high-risk regions and trends; performed preprocessing, feature engineering, and produced heatmaps and comparative charts.

TECHNICAL SKILLS

Core Language: Python (Advanced)

ML & Data Science: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, Model Building & Evaluation

Other Languages: C++, Java, JavaScript — introductory-level familiarity

Web (Introductory): MERN Stack — MongoDB, Express.js, React.js, Node.js, REST APIs

Tools & Platforms: Git/GitHub, Jupyter Notebook, VS Code, Streamlit, Microsoft Office

CERTIFICATIONS

- Machine Learning with Python
- Python for Data Science
- Google Cybersecurity Certificate
- Google AI Essentials
